ABOUT KINGCAD

OUR MISSION

Helping Manufacturers & Designers Say "YES" to More Opportunities

We help designers and manufacturers say "YES" to more opportunity by reducing bottlenecks through Expert Level Design on Demand Services, SolidWorks Training, and Manufacturing Services. Overall our customers save on costs through efficiency gains, reduction of rework, as well as making critical connections. We are not a 9-5 company and will make time for you if speed and quality are a necessity.

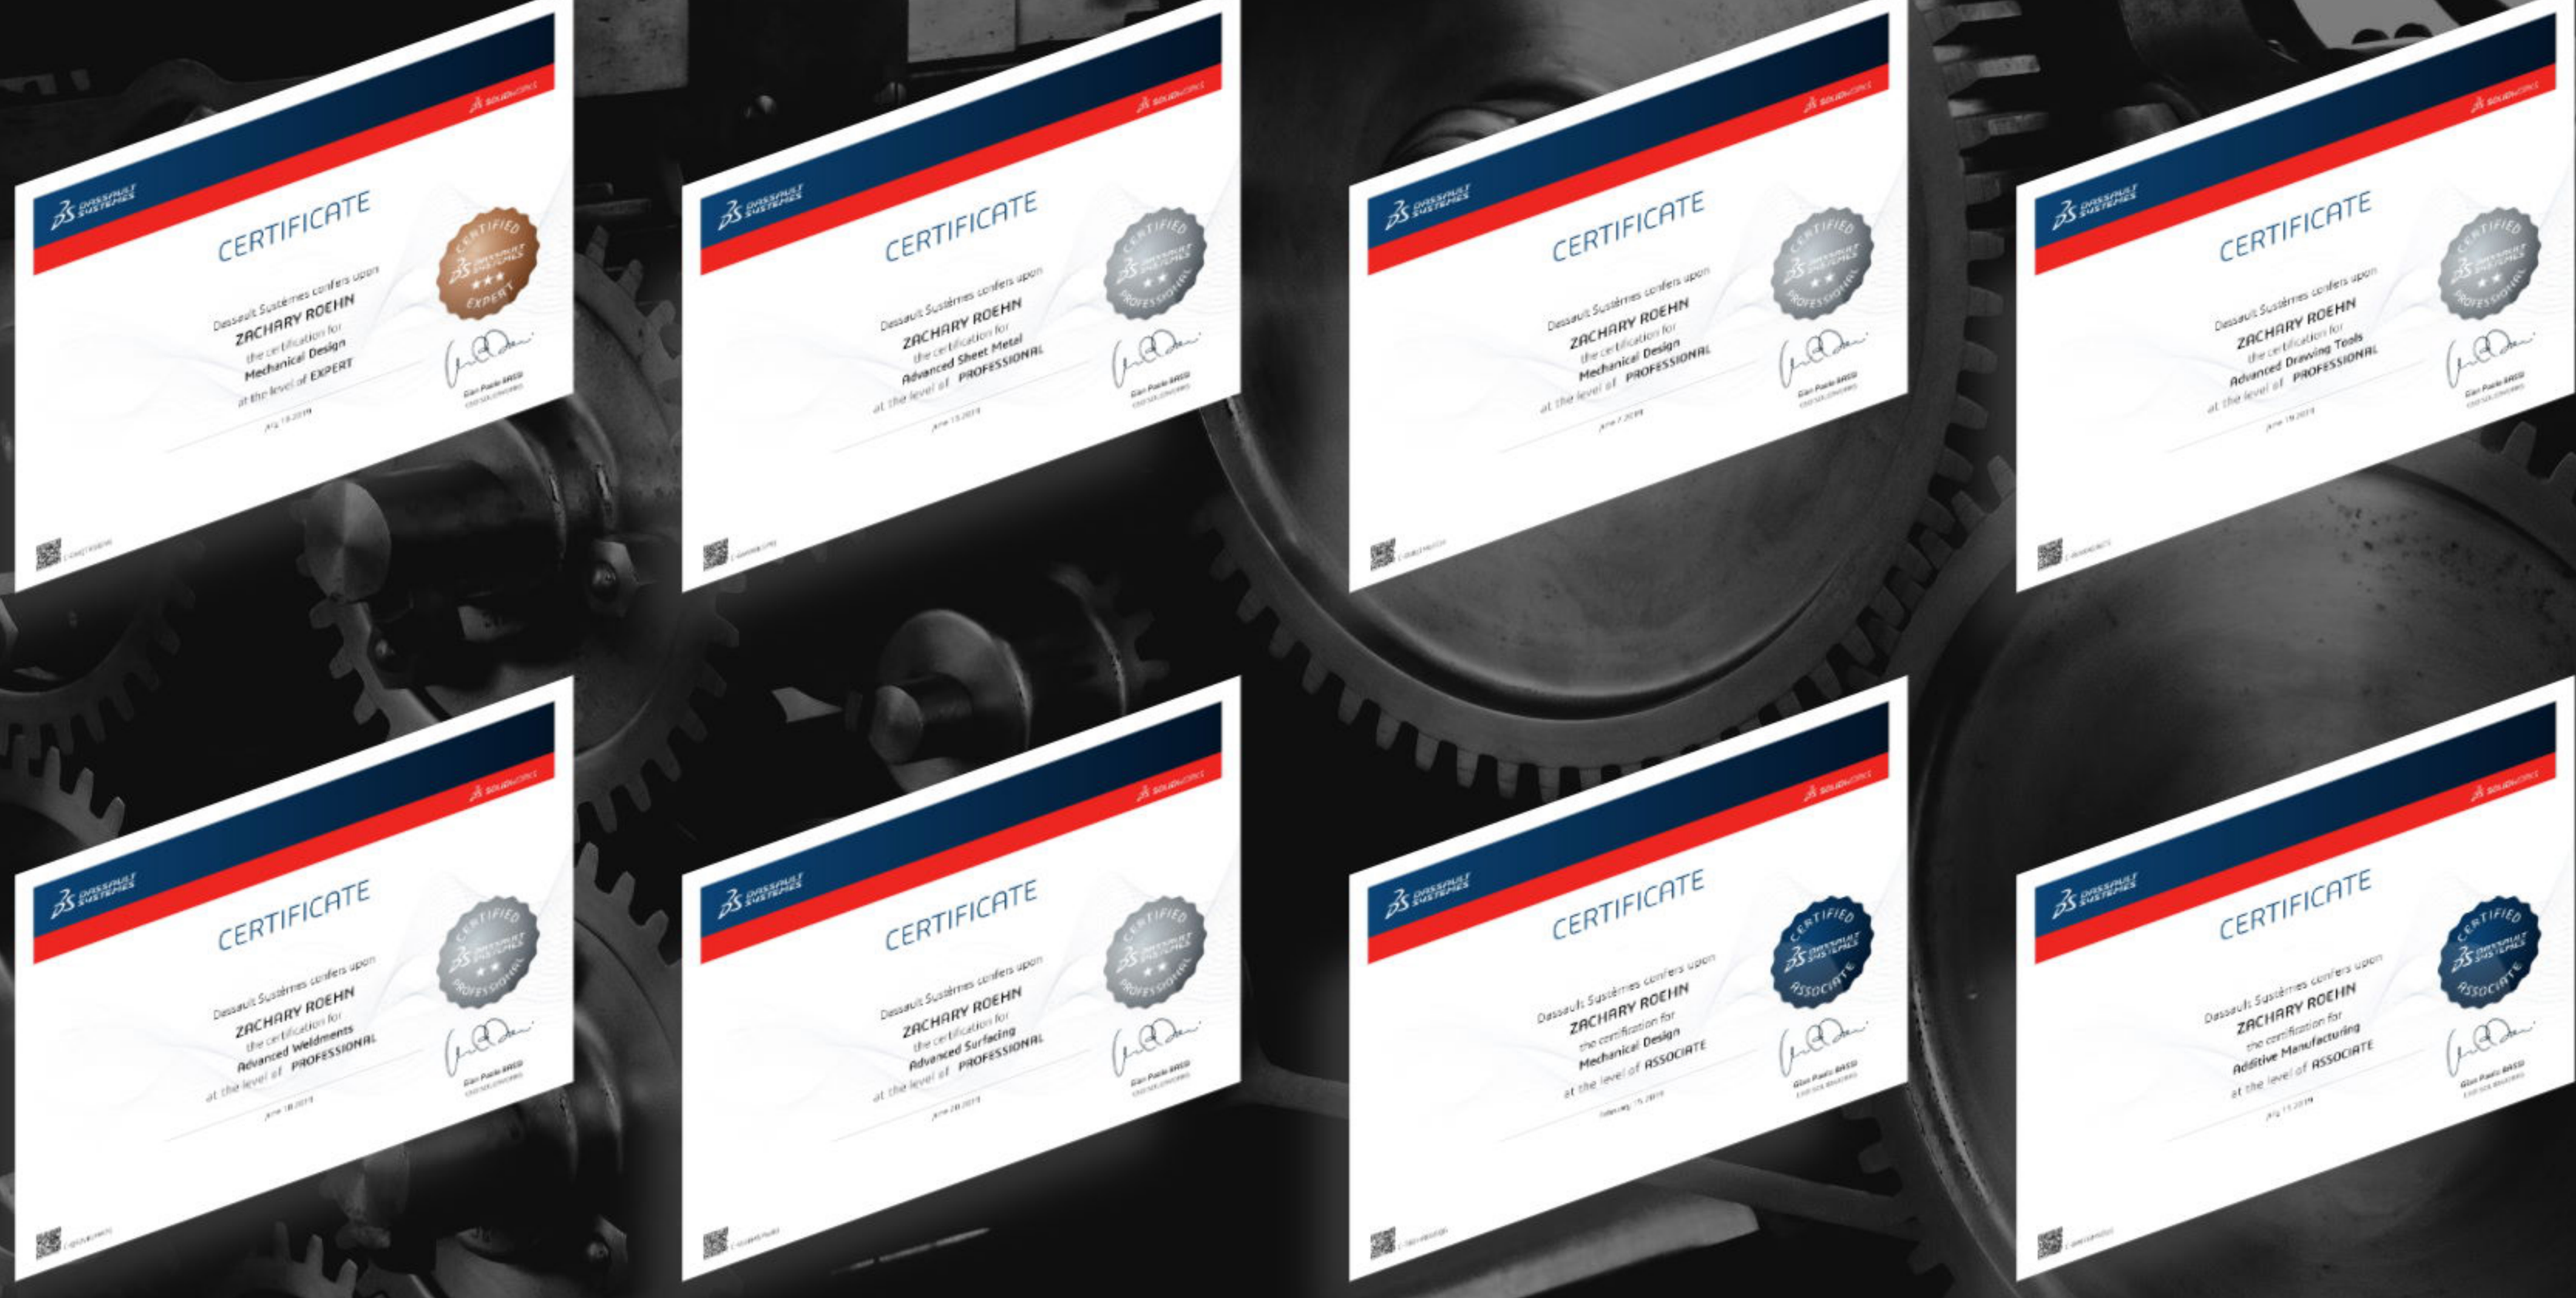

WHY CHOOSE US?

"You can do anything but you can't do everything."

- KingCAD was founded by a CSWE (Certified SolidWorks Expert), and a CSSP (Certified SolidWorks Sales Professional), which makes up a rare breed of industry experts. As of 2018 only 0.01% of all SolidWorks users have a CSWE, which is about 3,500 people worldwide.
- Communication with our team is seamless and our Sales Professionals will ask questions no other company will, to ensure completion of your job and to challenge the status quo your competitors may be stuck in.
- We understand that your project doesn't stop at design. We offer a full solution which includes SolidWorks training services to help your team get to market quicker and save time and re-allocate that towards your company having more choices.

ABOUT THE FOUNDERS

Zachary Roehn

Zachary Roehn is an industrial designer from Brooklyn, New York. He has been designing with CAD since 2014 and has worked on many projects including medical devices, combustion engines and mechanical systems. Zachary Roehn is a CSWE (Certified Solidworks Expert) who takes pride in his work. He graduated from the New York City College of technology at the top of his class, earning a bachelor's degree in mechanical engineering. In 2019 he founded KingCAD, in order to offer business owners and entrepreneurs the opportunity to get quality 3D-modeling services on an as needed basis.

Steve Vakulyuk

Steve is Brooklyn born, and Jersey raised. He has spent his entire career in the engineering space within roles ranging from Account Executive positions to training and coaching. Steve's success has been attributed towards the questions he asks – not the statements he gives. His number one aim is to understand and prioritize where a solution is best fitted to optimize a client's time. When it comes to customer-facing, Steve subscribes to the ideology of approaching each customer with the idea of helping them solve a problem. He is not afraid to ask the hard questions and is an experience to work with.
